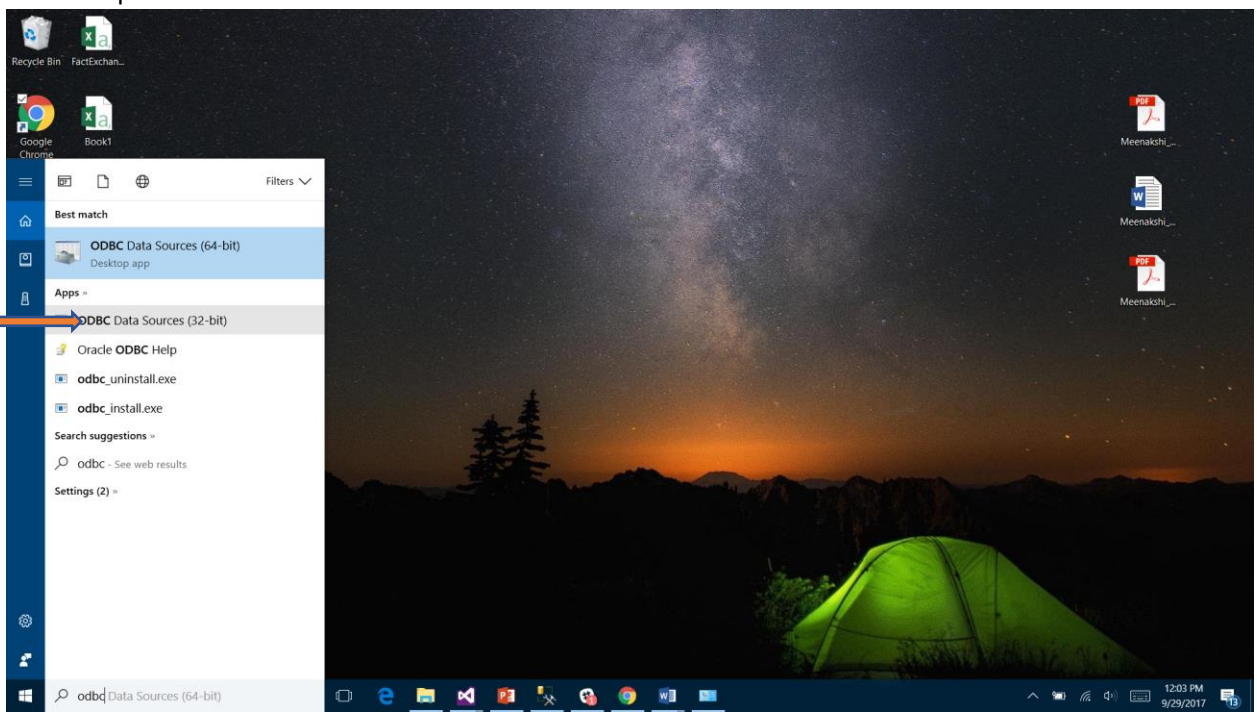
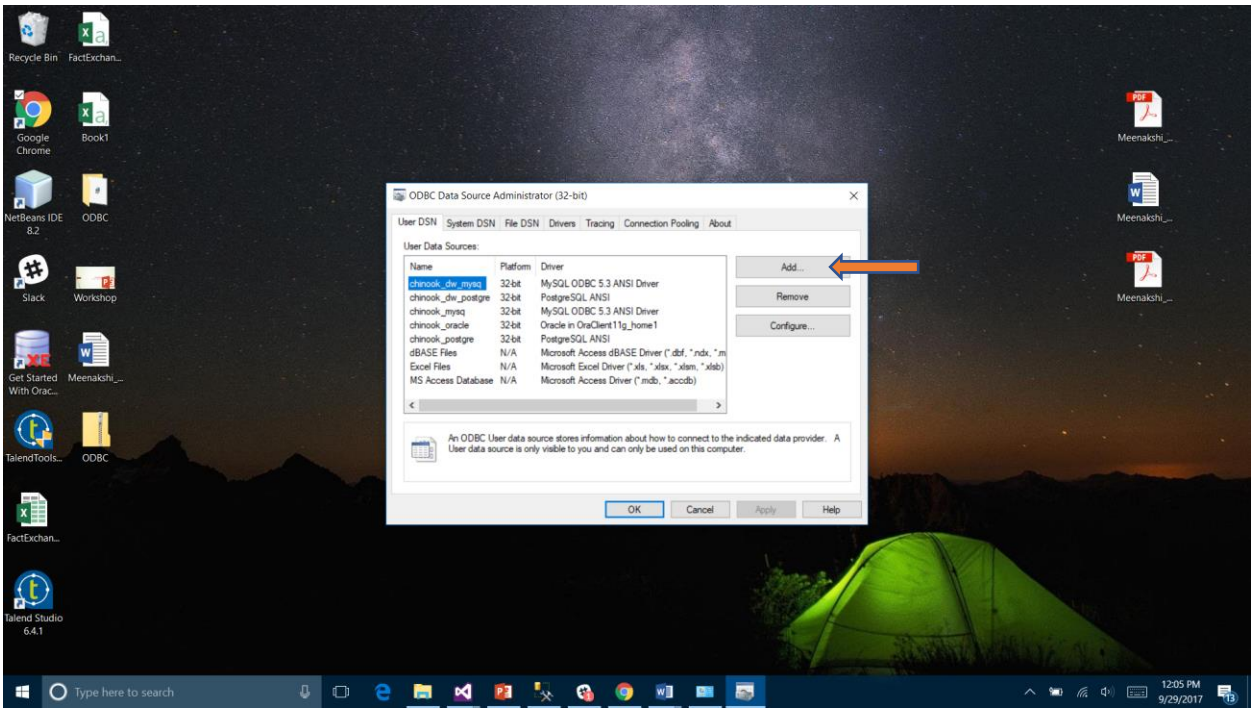
1.Download and install all three drivers.

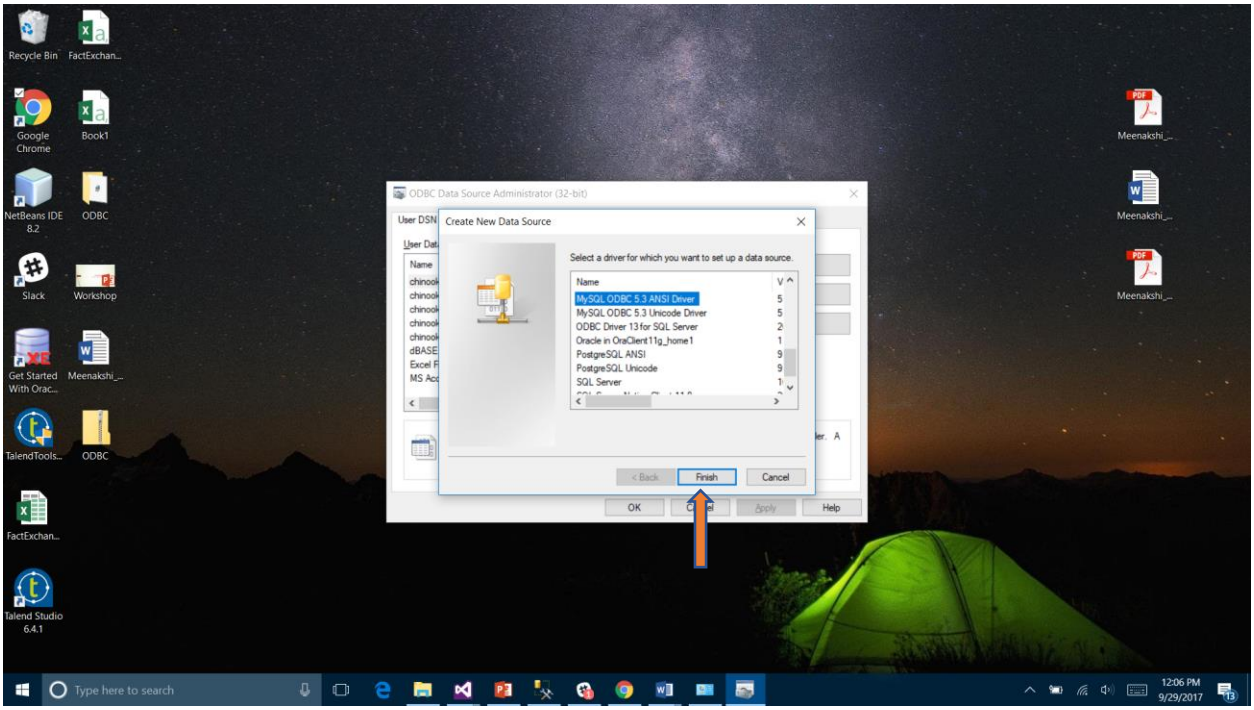
2. Then open ODBC data sources **32 bit**

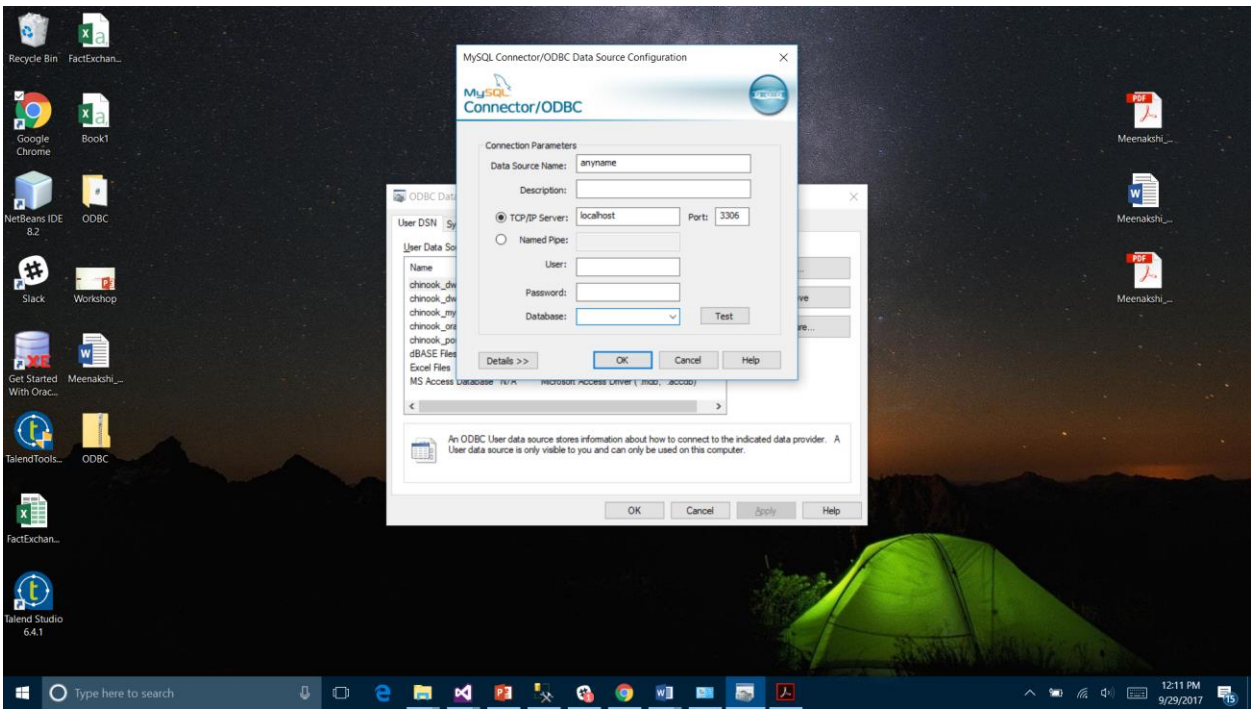




MYSQL

Choose mysql odbc 5.3 ANSI Driver for mysql

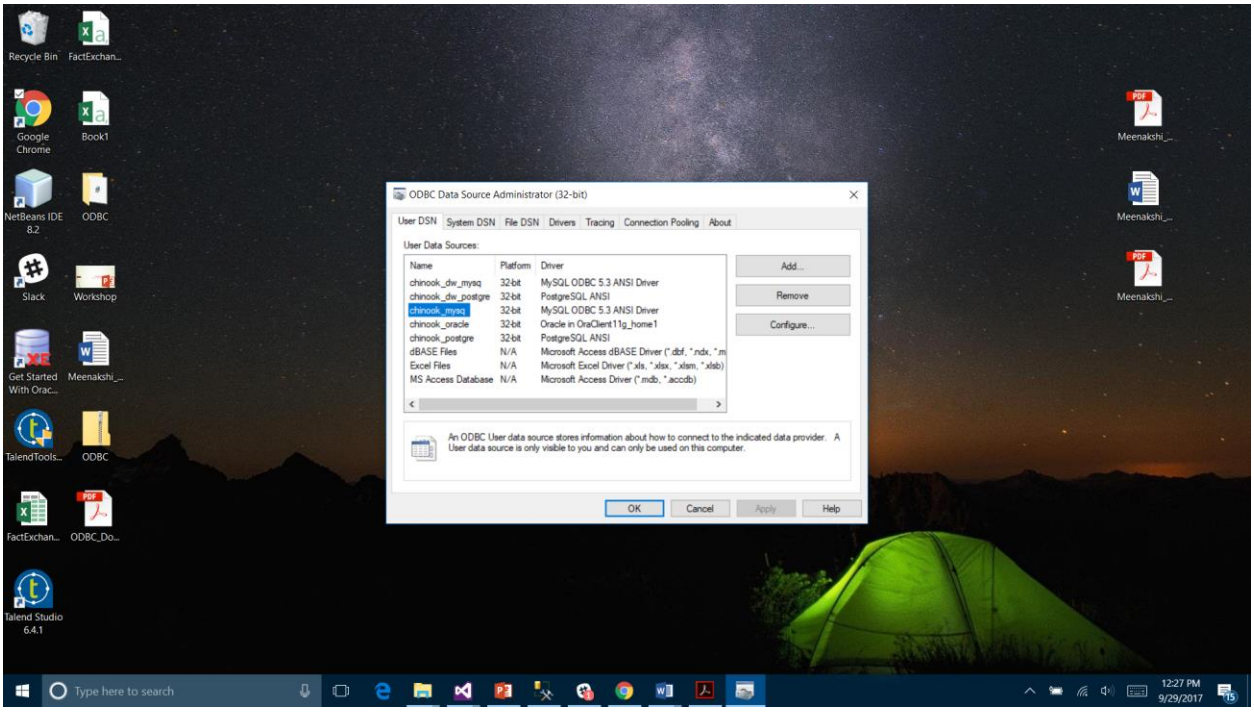




Enter your user id and password (info7290)

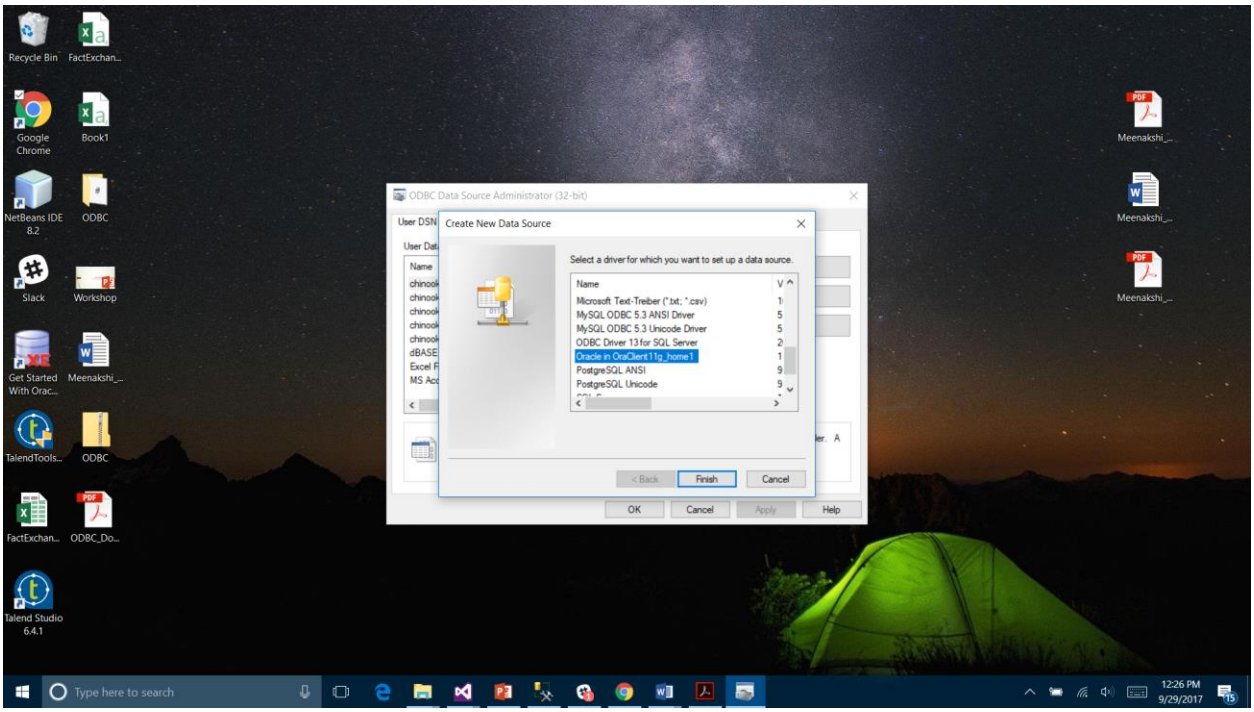
Select the database

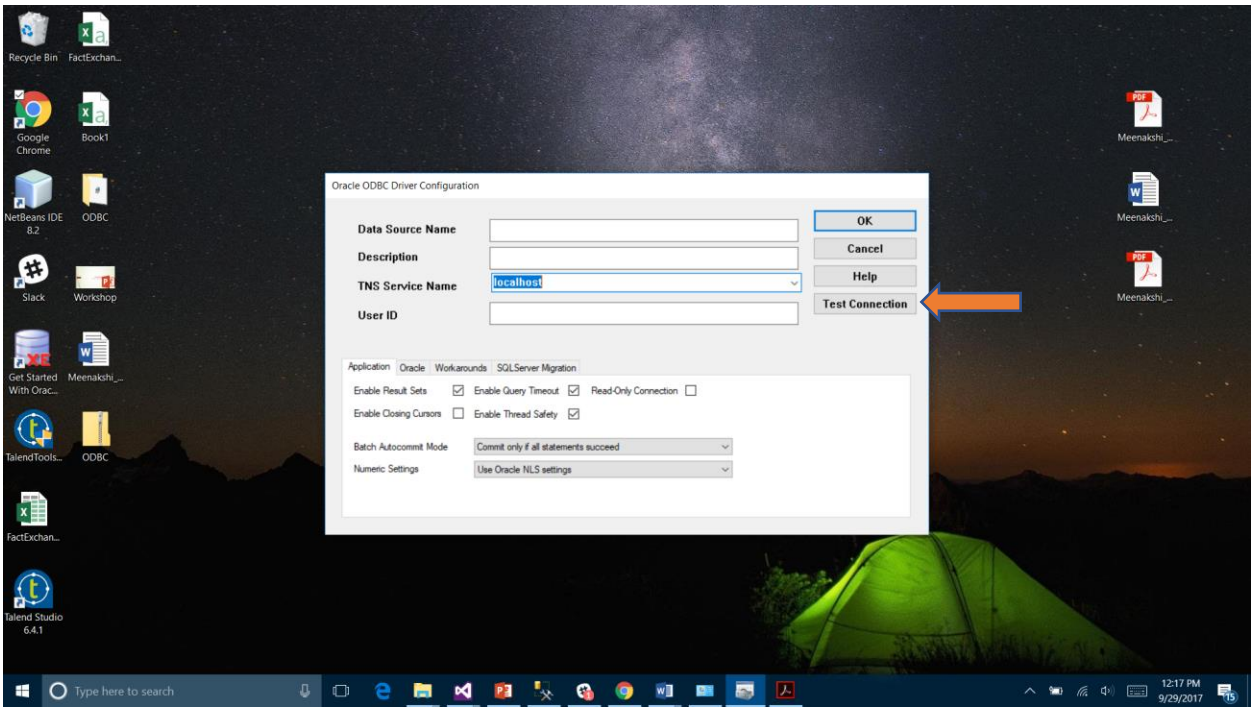
Click ok. You will get a connection successful window



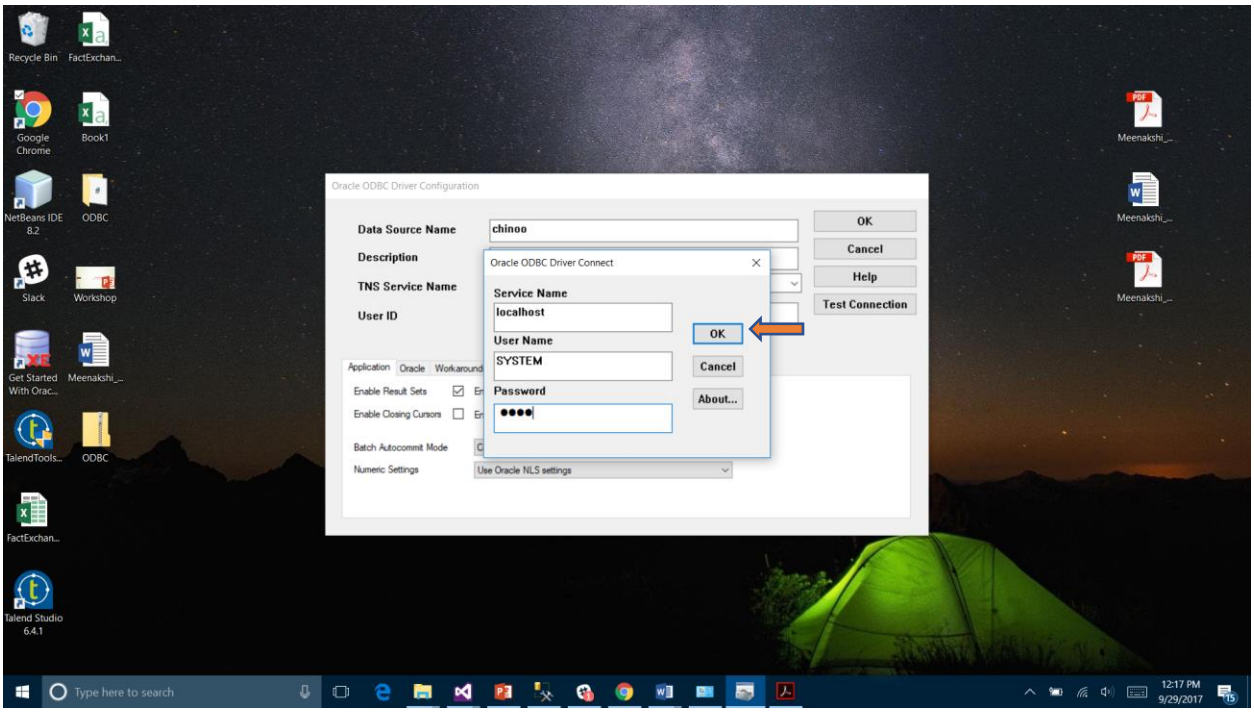
ORACLE

Choose Oracle in OraClient 11g_home1 for oracle

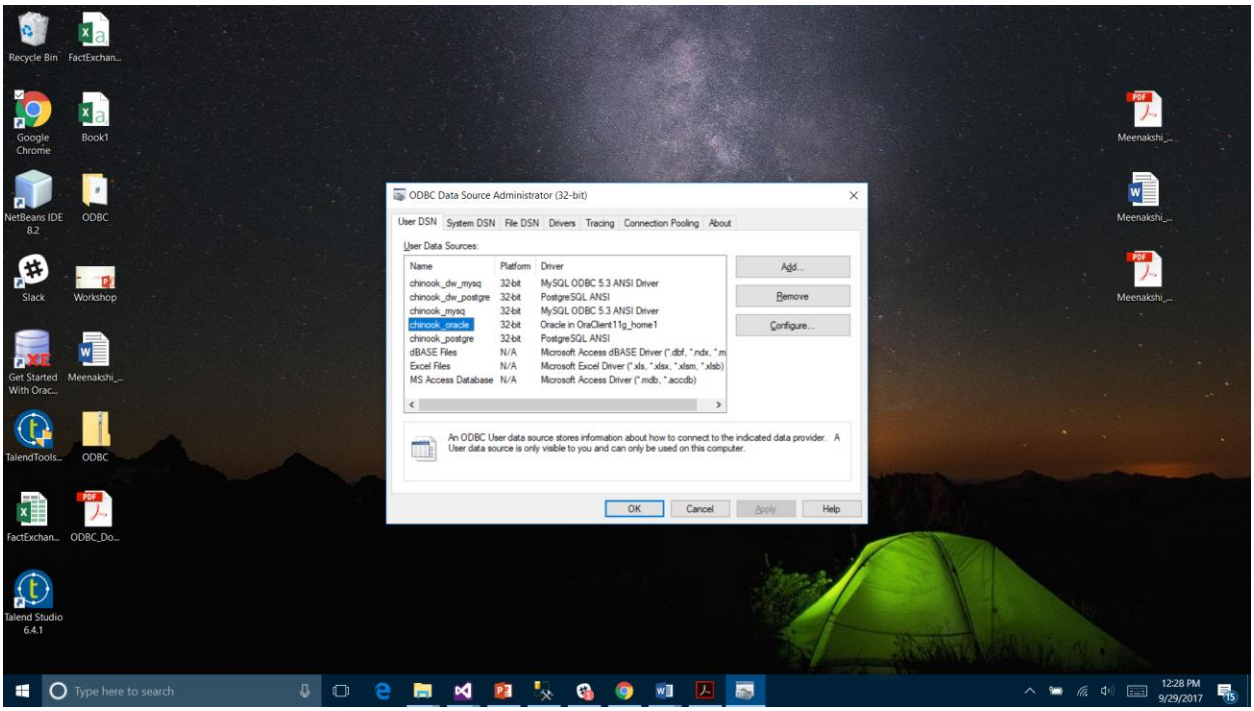




Enter any anme for datasource and enter you user id (info7290)

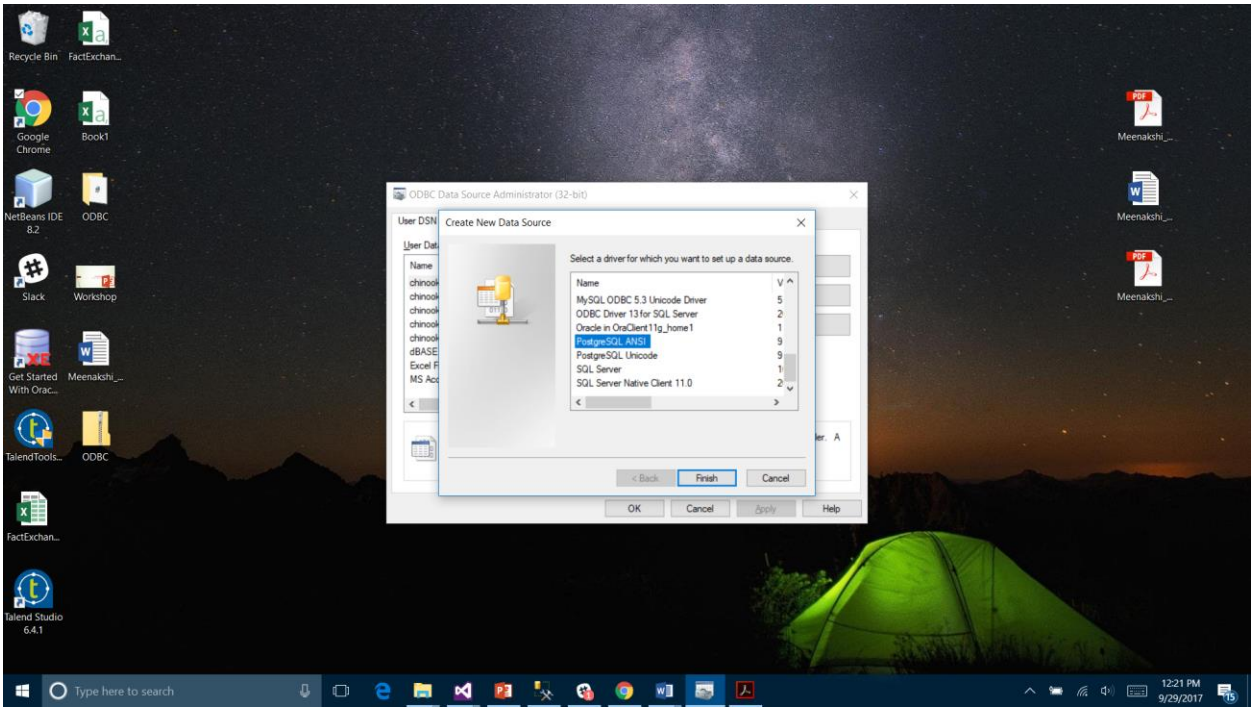


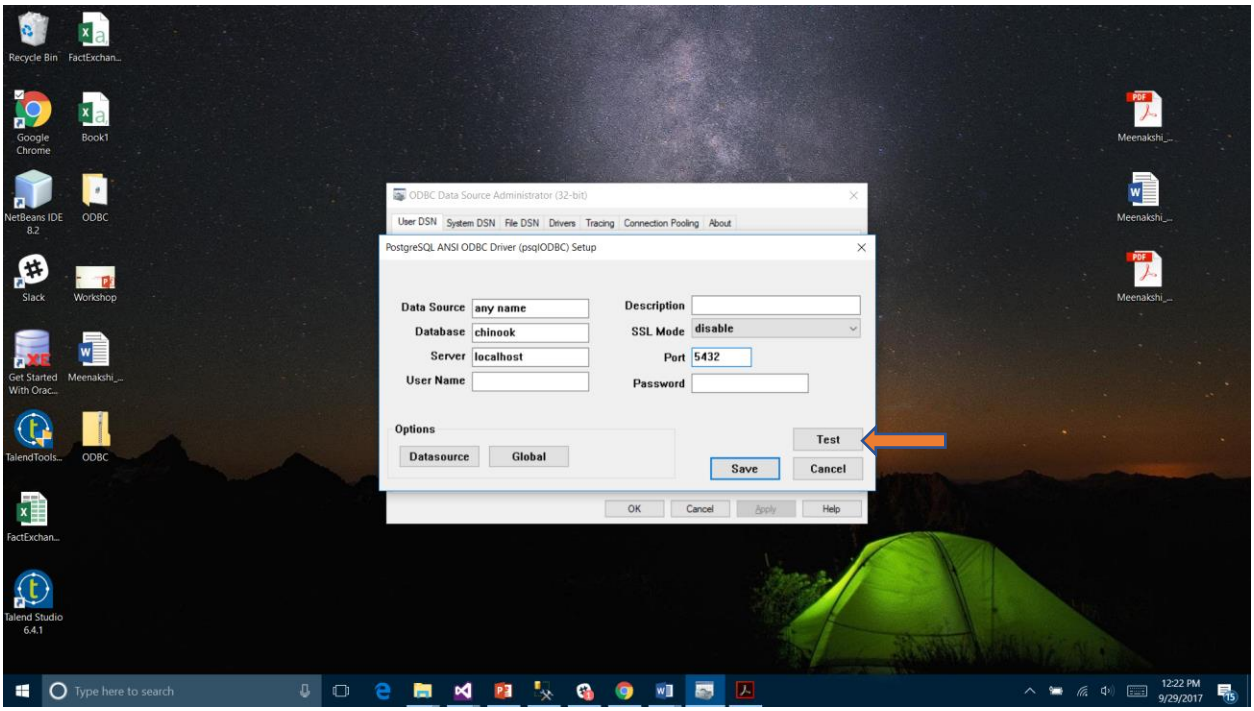
You will get a connection successful window



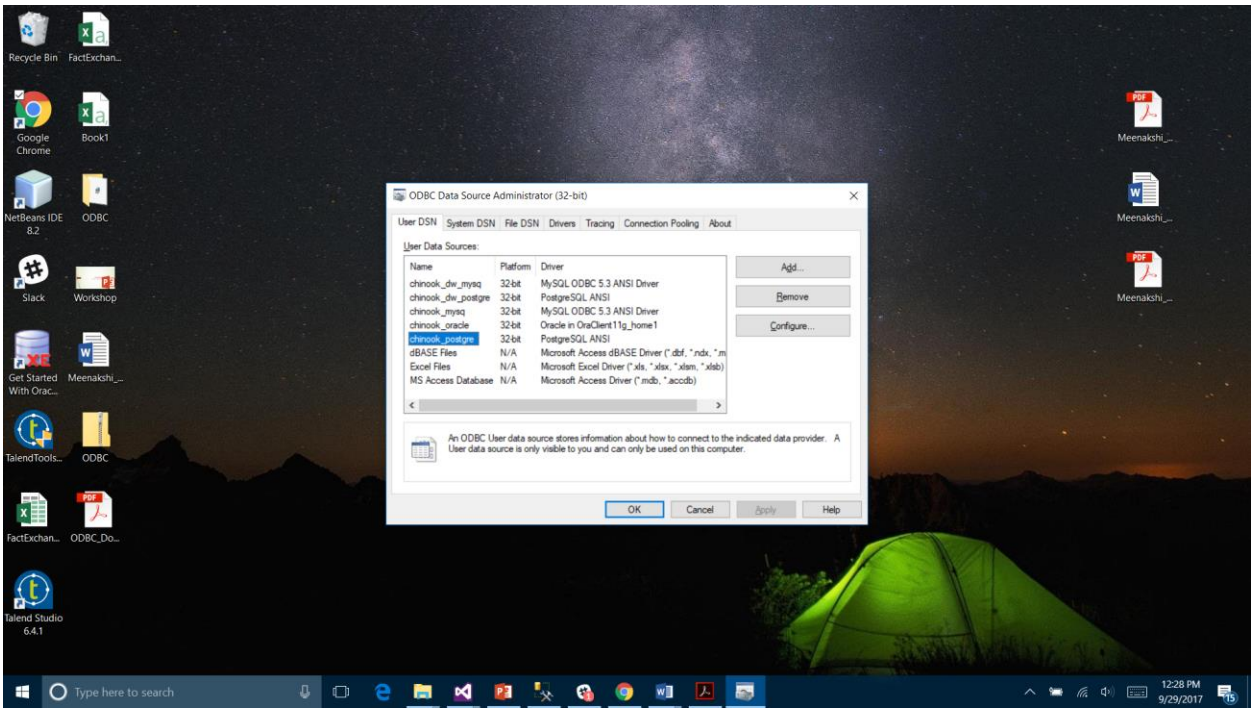
POSTGRES

Choose PostgreSQL ANSI for postgres





4.You will get a connection successful window.



5.Close all windows go to SSIS and proceed with connection.

6.Choose ODBC connection in connection manager for mysql, postgres and oracle

NOTE: You have to add datasource to each database separately. For example: add data source for chinook and chinook datawarehouse seperately
